

# Lunacats Website

Tomas Sandstrom

August 2019

This Document will provide you with the instructions needed to run the Lunacats NodeJS website. If you have any feedback or this document fails to answer any questions you have please make sure to contact the [Lunacats UNH Team](#).

## 1 Setup

- Clone or download the project from [Github](#)
- Install [NodeJS](#) on your machine
- Run the Command 'npm install' in a terminal window inside the project's directory
- Run the Command 'npm start' in a terminal window to run the project
- Goto <http://localhost:3000> in a browser

Once you complete the steps in order you should be able to use the website
